

Design earns award

■ THE first industrial building to be completed at the North Lakes business park, *pictured above*, has won an industry construction award.

The Snowdonia Air-conditioning Services building was named the Master Builders' best industrial building, up to \$4 million, at the Brisbane regional awards last week.

Set on 1421sq m, the building has been designed to be environmentally friendly.

It features solar hot water, energy-efficient lighting and airconditioning and an underground water tank.

The building, constructed by Builtwright, will be up for the overall Queensland Master Builders award in October.

The North Lakes Business Park will eventually provide about 5000 jobs for the northern Brisbane region.
