Getting started

Step 1

Choosing the right community will ensure future happiness once your home is completed. Willowdale is an award-winning masterplanned community setting a new standard for location, choice and services in a highly sought-after region.

Step 2

Once you've decided that Willowdale is the place for you, the next step is to determine the land options. Drop by our Sales and Information Centre near the Display Village to choose a lot that suits your needs.

Step 3

Now it's time to decide on the exact home design for you. Living in a home that reflects your individual style will make your life more enjoyable. When building a new home, it's important to consider what options are going to be affordable, functional and pleasant for you and your family.

Selecting a design that makes the best use of your chosen block and its unique site and environmental factors will have a huge impact on the comfort and quality of living in your new home. This is where the Display Village helps. Walk through the homes. Discover the many textures, finishes, orientations, floorplans and styles from recognised, experienced builders.

Find the style that is uniquely yours.

While you're there

Enjoy it

Take a moment to reflect on your visit or release any built-up energy if the kids are in tow. Remember to enjoy your visit and get excited about the process of shopping for a brand new home!

Use it

Each display home has an experienced building representative on hand to explain anything you need to know and answer your questions. Take a business card and follow up any queries you might have after your visit.

Remember it

Take notes while you're at the Display Village to reflect on once you leave – these could also be invaluable when it comes time to discussing ways to personalise your home with your builder. During your visit, try to picture yourself actually living in the home.

Revisit it

Be sure to take the time to give each home the attention it deserves. If your time is limited or the kids are losing interest, it is wise to make a second visit rather than rush through your inspection.
